

fast frame system assembly

Just follow these simple instructions. No special tools required.

- Package contents per Frame Kit:
- a. 4 Frame Corners
 - b. 4 Frame Panels
 - c. 1 Flexible Graphic Panel

Inspect the contents of your *Fast Frame*.

Layout all parts on a flat surface.

Build out the *Fast Frame* by laying out the four frame panels (b) in the required shapes.

Insert corner connectors (a) into frame panels (b) as shown to create a solid frame.

Insert flexible graphic panel by guiding the beading into the specially designed channel.

Your *Fast Frame* is now complete. Graphic panels can be easily removed and replaced any time you wish. Frames can be stored fully assembled, or detached and stored in a compact reusable carton.
